Education

Northeastern University – Khoury College of Computer Sciences **September 2024 - May 2028**

Candidate for Bachelor of Science in Computer Science, Concentration in AI | GPA: 3.9/4.0 *Boston, MA*

Relevant Coursework: Object-Oriented Design, Computer Systems, Foundations of Data Science, Introduction to Digital Design and Computer Architecture, Fundamentals of Computer Science 1 and 2.

Awards: Deans List Fall 2024, Spring 2025, Fall 2025

Clubs: NUWIT, FirstByte, Northeastern Ultimate Frisbee, Northeastern Rock Climbing Club.

Technical Skills

Languages: Proficient: Java. Familiar: C++, JavaScript, Python, HTML, CSS, Racket

Technologies & Tools: React, Node.js, Git, VS Code, IntelliJ, Eclipse, WordPress

Certifications: CompTIA Security+ (SY0-701), Controlled Unclassified Information Training, Facility Security Officer Training, Information Systems Training

Projects

Code Sentinel | *In Progress* — *JavaScript, HTML/CSS, Git, React* **June 2026 - Current**

- Built a full-stack AI-powered security vulnerability analyzer using React, TypeScript, and Node/Express, integrating the Gemini API to detect and explain common vulnerabilities in user-submitted code
- Engineered an end-to-end vulnerability detection pipeline with a structured prompt system that returns JSON-formatted findings including OWASP category, severity rating, and fix suggestions

NUEvents | *Completed* — *JavaScript, HTML/CSS, React, Node.js, Git* **January 2025 - April 2025**

- Engineered a full-stack campus engagement platform using React frontend and Node.js backend, enabling students to discover and track campus events with integrated calendar synchronization to mobile devices
- Implemented an interactive swipe-based UI inspired by modern mobile applications, utilizing React hooks and component-based architecture for seamless state management and real-time event filtering
- Presented in front of 50+ people and collaborated in an Agile team environment using Git branching strategies for efficient feature development and code review processes

Storm of Crimson | *Completed* — *Java* **October 2025 - December 2025**

- Collaborated in a two-person development team utilizing Git version control to build a multiplayer strategy card game with 50+ unique cards and cascading game mechanics.
- Architected the application using Model-View-Controller pattern and implemented publisher-subscriber design pattern, ensuring separation of concerns and real-time synchronization between game state and UI components
- Developed a comprehensive GUI using Java Swing with custom card rendering, animation effects, and interactive controls while implementing core game logic and achieving 95%+ code coverage through extensive JUnit unit testing

Experience

KRI at Northeastern University **January 2026 – June 2026**

Industrial Security Co-op *Burlington, MA*

- Designed and built research institute website (kostas.sites.northeastern.edu) using WordPress block editor, delivering responsive page layouts, branded styling with CSS custom properties, and dynamic content components
- Supported security operations by preparing materials for institutional briefings and maintaining training documentation in compliance with NISPOM and CMMC requirements.
- Assisted with visitor access control systems, document management processes, and administrative security protocols to maintain compliance with institutional security standards.

Starbase MN Inc **June 2022 – Current**

Volunteer *St. Paul, MN*

- Organized and analyzed survey data in Google Sheets to drive recruitment of 20+ Minnesota elementary schools into a free science equipment program for 5th graders, then built and maintained tracking spreadsheets for participation, equipment distribution, and program effectiveness that improved operational efficiency and cut costs
- Delivered presentations on STEM, computer science, and security fundamentals to 50+ elementary-aged students, translating complex concepts for a non-technical audience.

Interests

Traveling, Rock Climbing, Ultimate Frisbee, Hiking, Board and Card Games
